

NOSTR AFRICA · CUSTOMER GUIDE

Getting started with Nostr Pay

Receive and send Bitcoin Lightning payments from your own wallet page.

payment.nostr.africa · Updated October 2026

Nostr Pay is a Bitcoin Lightning wallet and payments page at **payment.nostr.africa**, built on the open-source LNbits software. Amounts are shown in **sats** (satoshis, small units of bitcoin).

HOW YOU GET A WALLET

Nostr Pay is ordered as a build. There is no public sign-up: we create your account and give you your login details.

PLEASE READ

Lightning payments cannot be reversed once sent, and we cannot promise that every invoice will settle. Start with small amounts, keep only what you need in the wallet, and keep your login details private: anyone with access to your wallet can spend from it.

1 Sign in

1. Go to **payment.nostr.africa**.
2. Sign in with the username and password we gave you.
3. Your wallet opens, showing your balance and recent payments.

2 Receive a payment

1. In your wallet, click **Receive**.
2. Enter the amount and an optional note (memo), then create the invoice.
3. Show the QR code to the payer, or copy the invoice text and send it to them.
4. When the payment arrives, it appears in your wallet's payment list. Invoices expire after a while; create a new one if needed.

3 Send a payment

1. Click **Send**.
2. Paste the Lightning invoice you received, or scan its QR code.
3. **Check the amount and description**, then confirm the payment.

4 Extras for shops and phones

These add-ons are installed on Nostr Pay. Ask us if you would like one turned on for your wallet:

Add-on	What it does
TPoS	A simple point-of-sale screen: type an amount at the counter and show the customer a QR code to pay.
LndHub	Connect a compatible mobile Lightning wallet app to your Nostr Pay wallet.
LNPOS	Use an LNPOS point-of-sale device with your wallet.

TIP

Before using Nostr Pay with customers, test it: send yourself a small payment from another Lightning wallet and check that it arrives.
