

Running a visibility audit with Nostr Africa SEO

Check how easily customers find you on Google, in AI answers and through AI agents.

seo.nostr.africa · Updated October 2026

Nostr Africa SEO checks a web page against **60+ checks** in **11 visibility areas**, from classic search to AI answer engines and AI agents. It combines them into one **Visibility Score** and turns every problem into a task. The free audit needs **no sign-up**.

In short

- 1 Paste a URL
- 2 Read your score
- 3 Work through the action plan
- 4 Ask the AI strategist
- 5 Print a report

1 Run an audit

1. Go to **seo.nostr.africa** and click **Run free audit** (or **Run audit** in the dashboard).
2. Paste the address of the page you want to check, for example your home page, and start the scan.
3. The tool checks the page itself plus the site's robots.txt, sitemap and llms.txt files. Results usually appear within seconds.

Each audit checks **one page**. Audit your other important pages (services, products, contact) one by one.

2 Understand your score

The **Dashboard** shows your Visibility Score: the average of the 11 areas below. Open any area under **Modules** to see each check marked as passed, warning or failed.

Area	What it looks at
SEO	Titles, headings, indexing rules, sitemaps, image text and security
SERP	Structured data for rich results (FAQs, breadcrumbs, products, articles, preview images)
CTR	How inviting your search snippet is: title length, brand, a clear call to action
AEO	How well content answers questions: question headings, short answers, lists, FAQ markup
GEO	How easy content is for generative engines to quote: facts, sources, depth, freshness
AIO	Signals AI search relies on: organisation data, social profiles, consistent brand name, crawler access
LLMO	llms.txt, clear brand descriptions and AI-crawler permissions
AXO	Whether AI agents can read and use your site: content without scripts, structure, labelled forms
SXO	What happens after the click: speed, mobile setup, page weight, a visible next step
E-E-A-T	Trust signals: authors, dates, about and contact pages, privacy policy, reviews
YMYL	Extra checks for health, finance, legal and safety topics: disclaimers, expert authors, citations

3 Fix things with the action plan

Open **Action plan** ("What to fix next"). Every failing check becomes a task, grouped as **High impact**, **Medium impact** and **Quick wins**. Start with high impact and quick wins, then run the audit again to see your score change.

4 Ask the AI strategist

On a module page, click **Generate plan**. The AI strategist writes an executive summary, priority actions, a 90-day roadmap and ways to measure success, often with copy-ready code. You can **Copy** or **Export** it and mark actions as done.

CHECK AI SUGGESTIONS

AI recommendations are a starting point. Review them, or ask your web developer, before changing your live website.

5 Projects and reports

- **Projects** lists every site you have audited with its latest score.
- **Reports** gives a clean summary with top priorities. Use **Print / save PDF** to share it with your team or clients.

YOUR AUDITS ARE SAVED IN THIS BROWSER

Audit results are kept in your web browser on this device (your most recent audits). They are not visible on other devices, and clearing your browser data removes them. Save a PDF report of anything you want to keep.

6 Paid plans

The free audit is available to everyone. Paid plans for agencies and brands are listed on the **Pricing** page and are activated after payment and admin approval. To subscribe, contact us by email or WhatsApp.

Scores and recommendations are guidance to improve visibility. No tool can guarantee a ranking on Google or a mention in AI answers.
