

Scheduling posts with Nostr Africa Social

Plan, write and schedule your social media posts from one place.

mixpost.nostr.africa · Updated October 2026

Nostr Africa Social is a social media scheduler based on Mixpost. Write your posts once, choose the accounts to publish to, and schedule them, instead of switching between networks by hand.

HOW YOU GET ACCESS

Social is ordered as a build. We create your login at mixpost.nostr.africa. Which social networks you can connect depends on what we set up for you, so tell us which accounts you want to manage.

In short

- 1 Sign in
- 2 Connect your accounts
- 3 Write a post
- 4 Schedule it
- 5 Check the calendar

1 Sign in

Go to **mixpost.nostr.africa** and sign in with the email and password we gave you.

2 Connect your social accounts

1. Open **Accounts** and choose to add an account.
2. Pick the network and sign in to it when asked, to give Social permission to post for you.
3. The account then appears in your list, ready to select when you write a post.

If an account later stops posting (for example after you change its password), connect it again.

3 Write and schedule a post

1. Open **Posts** and create a new post.
2. Select the account or accounts it should go to.
3. Write your text and add images or video from your computer or the **Media** library.
4. Check the preview for each network.
5. Choose a date and time and schedule it, publish it straight away, or keep it as a draft.

4 Stay organised

- The **Calendar** shows what is scheduled on which day, so you can plan a whole week or month.
- Use the post list to see drafts, scheduled, published and failed posts.
- Check the time zone in your settings so posts go out at the time you expect.

TIPS

Each network has its own rules for text length, image size and video length. Keep a few posts scheduled ahead, and check failed posts: the usual fix is to reconnect the account.
